### I. Demographic Links and Resources on the Web

*Wikipedia* has entries on Islam by country and region on this same [page](#), which information is based mainly on the [CIA Factbook](#), [Adherents.com](#), and the US State Department's International Religious [Freedom Report](#). Other organizations make it their business to count Christians and non-Christians are:

- [www.adherents.com/](#) publishes data on religious populations.
- Center for the Study of Global Christianity: Their two main reference [works](#) are: *World Christian Encyclopedia*, 2nd edition and *World Christian Trends*. They incorporate their data at the World Christian [Database](#). Here are some of their [tables](#) on the number of Christians and Muslims in various countries.
- The Association of Religious Data (ARDA) lists surveys, [graphs](#) and maps for the US, including [religiosity](#), number of [adherents](#) and [congregations](#)
- [Valparaiso](#) U. maps out religious adherents in America, including [Muslims](#).

*Wikipedia* has a [write-up](#) on the demographics of world religions, a demographic [data](#) table tied to a [map](#) of where Sunnis and Shias predominate globally, a [map](#) of dominant religions in Europe and part of the Mideast, and map of which religion dominates where in the [world](#), and a map just how seriously religious folk take their religion around the [globe](#).

*Wikipedia* has a map that shows global Muslim [distribution](#) where Muslims are the majority. Unlike other [maps](#) that shade or color on a country-by-country basis, it pinpoints the Muslim [populations](#) almost to the grid square.

*Wikipedia* has a data [table](#) with the percentage that are Christian in each country tied to a [map](#), and a [map](#) where Catholics, Protestants and Orthodox dominate. *Spiegel* also has an [article](#) on the distribution of Catholics, Protestants, Anglicans, and a [map](#) on the percentage of Christians globally.

*Wikipedia* has plugged the CIA's births-per-thousand info in this [data table](#), and tied it to this map: [small large](#). At the end of this study is a data table and map that incorporates CIA's Children per Woman data, along with other data. The maps at the end of the study are different in that one can drill down and see the details on each country.

Factbook has Muslim population figures along with a map on the same [page](#). *Map Quest*'s atlas has quick facts under most of its [maps](#), including a field on religion. Maps-of-War has an animated map that shows [Mideast empires](#) as they rise and fall, and another that shows the rise and spread of the major [religions](#). Moraine Valley College has a [map](#) of the major languages in Islamdom.

Miscellaneous demography resources:

- [World Population](#) Info By Year, World Population [Clock](#), [Statistical Abstract](#) of the United States
- One can retrieve historic data and population projections for any region or country up to 2050 from the UN Population [Database](#).
- [Unreached Peoples in the 10/40 Window](#)
- Relief Web [maps](#) and other data
- Islam data and [map CD](#) by Global Mapping International meant for evangelism to Muslims
- Language [maps](#) by Global Mapping Intl meant for evangelism
- Blogs dealing with global demography issues: [AmericanFuture.net](#), [DemographyMatters](#)
- [Map](#) of the EU
- The Islamic population bomb article ([Serbianna.com](#))
- [Wikipedia](#) on the Developed Nation's Population Decline
- [Wikipedia](#) world population [data table](#) and [map](#).

## II. Demographic Map-making Tips and Resources

For ease of viewing maps, *Adobe Acrobat* and the *FireFox* browser have a point-and-magnify feature that is useful for view detailed maps like at the end of this document. Also, one can check out map-making [software](#), e.g., [Microsoft Office Map](#), [Smart Draw](#) and [Google Earth](#).

Blank outline maps are at [WorldAtlas.com](#), [About.com](#) and [Amaps.com](#), but they come with restrictions, e.g., for education use only, and most of them are too small. [Here](#) is a large-format (2400+ pixels wide, expandable to 5010+ pixels wide), royalty-free, public-domain outline world map without any fine print legalese attached, suitable for shading or filling in with color. Here's [another](#) like it but with the two-letter country codes. The legends seen below are [here](#) in the bmp format, and the maps seen below (but without color) are here in the jpeg format: [north](#), [middle](#), [south](#).

About editing maps: Gif (.gif) and jpeg (.jpg) formats have smaller file sizes than the 24-bit color bitmap (.bmp) format, but gif and jpg formats insert gray dots that interfere with paint-bucket filling or color flooding. So edit using the bmp or similar format, but then convert maps to a second file using the smaller gif, jpg or Adobe pdf formats to email or post on the Web.

Use the threshold feature to clear out stray gray pixels if color flooding isn't filling to the borders of an area. Also, note that the flooding feature works with any uniform color field. So if you filled in the wrong color and can't just undo it, merely color flood it again with the correct color.

If your computer or software cannot handle editing large graphic files, split the world map into different files, edit them and then re-assemble into one graphic file. Otherwise, import the split maps into a PDF file where they'd appear together in the order you specify. Make sure the resolution is uniform across all your maps, and resize if necessary, or else one map or graphic may appear smaller or larger than the others when converted to the pdf format.

## III. Christian and Muslim Demographic Tables and Maps

### A. Percent of All Muslims/Christians Demographics Table By Continent/Region for 2006

Continent/Region	Number of Christians	Percent of All Christians	Number of Muslims	Percent of All Muslims
Africa	400m	19.5	459m	29.64
Americas	774.7m	37.78	8.7m	0.56

Asia	256.7m	12.5	1.03b	66.68
Europe	600m	29.2	48m	3.1

<u>Sources:</u> <a href="#">Wikipedia</a> <a href="#">CIA Factbook</a>							

\*The CPW is weighted by the population of each country represented in that region. The CPW data is compiled from the CPW table found below, which was extracted from the Rank-Order CPW [CIA Factbook 2006 page](#). The 2.59 CPW for the World is also found on the [World](#) page of the [CIA Factbook 2006](#).

\*\*The Caucasus here is limited to Armenia, Azerbaijan and Georgia.

\*\*\* Others estimate that there are only 1.2b Muslims. All data besides the CPW data are compiled from [Wikipedia](#) statistics with a few corrections. Notice that the population figures are not the same as that in the CPW table below that uses [CIA Factbook](#) data current as of Jul 2006.

### C. Regions Promising Noticeable Muslim and Christian Natural Growth

Often when Christianity or Islam's growth is discussed, various hotspots are brought up as supposedly being indicative of a region's growth. For instance, some have said that Yemen, with its 6.58 CPW birthrate would surpass the population of Russia in a few decades. It is also implied that most of Islamdom's population is growing at the same rate as Yemen.

One can suppose that Yemen's growth rate is caused by oil wealth increasing the overall health of the populace, and traditional attitudes about family size are still the norm for now. The explanation for high population growth in other places is one can assume that people are too poor to obtain birth control. In the long-term, Yemen's current population growth will be seen as unsustainable, since Yemen is a desert and may well run out of oil within a few decades.

Not only is Yemen's growth rate unsustainable in the long term, but since Yemen only has 21.5m people, so its higher CPW (6.58) barely impacts the region's population growth. The 259.9m people in the Mideast have a Weighted CPW of 2.93, as can be seen on the global map that shows CPW by region.

In the following two tables, I extracted data from the table in the previous section. The selection criteria were that the regions had: 1) a CPW that is significantly elevated over the replacement rate of 2.1, and had 2) more than 50m Christians or Muslims. This gives a more realistic picture of Christianity and Islam's global growth potential.

Religions grow or shrink based not only on the birthrate, but also through evangelism. Notice that judging from birthrate alone, Islam's Natural Growth Potential (NGP) is twice that of Christianity in those regions that promise significant growth (961 vs. 1975). Thus, evangelism, especially in high population growth areas, is important if Christianity wants to maintain or increase its share of the world's population relative to Islam's share.

Regions Promising Significant Christian Growth				
Region	Weighted CPW	Christian	Total Population	% Christian
Central Africa	6.32	59.18m	83.1m	71.22
East Africa	5.40	115.32m	195.00m	59.14
Southern Africa	4.09	93.78m	137m	68.45
West Africa	5.41	100.13m	276.6m	36.20
Average CPW	5.31	Total	Total	Weighted %
Weighted CPW	5.22	368.41m	691.70m	53.26%

NGP: Weighted CPW (5.22) x Half of Total Christians (184.2m) = 961

Regions Promising Significant Muslim Growth				
Region	Weighted CPW	Muslims	Total Population	% Muslim
East Africa	5.4	74.08m	195m	37.99
Middle East	2.93	253.87m	259.9m	97.68
North Africa	3.04	182.68m	203.5m	89.77
West Africa	5.41	138.11m	276.6m	49.93
South Asia	3.01	499.2m	1.49b	27.25
Average CPW	3.96	Total	Total	Total
Weighted CPW	3.44	1.148b	2.43b	47.24%

NGP: Weighted CPW (3.44) x Half of Total Muslims (574m) = 1974.56

### D. Children per Woman (CPW) Demographic Table for the Globe as of 2006 (Ordered by Weighted CPW/Population)

Ordered by Weighted CPW	CPW Weighted Avg*	Total Pop.	Ordered by Population	CPW Weighted Avg*	Total Pop.
Central Europe	1.27	74.5m	Caucasus	1.93	15.6m

Eastern Europe	1.27	212.8m	Caribbean	3.64	23.9m

<b>Total</b>	<b>489.7m</b>	<b>401m</b>	<b>17m*</b>	<b>89.1%</b>	<b>3.5%*</b>	<b>14.6%</b>	<b>1.52**</b>
<b>Source:</b> <a href="#">Wikipedia</a>							

\*This table is compiled from *Wikipedia* statistics with some corrections. The table shows that 3.5% of the EU is Muslim, but the *CIA Factbook* says the [European](#) Union (EU) is 3.12% Muslim, with only 14.3m Muslims.

\*\*The weighted average CPW, based on the population of each country in the EU, is 1.5, very close to the straight average of 1.52. The EU is slightly more prolific than Europe as a whole that has a **1.42 CPW** (see the table above).

**F. Children Per Woman (CPW) Per Country, and Weight Average by Country/Region  
(Data is Compiled From the *CIA Factbook*, July 2006 Estimates).**

**Note:** These 173 countries represent all the countries with both appreciable land mass and population, i.e., ones that stood a chance of showing up in this study's colored global maps.

#### G. Demographics Data Table, Listing By Country for 2006

##### Abbreviations:

**ID** = Insufficient Data, i.e., Islam not listed in the religions present, but could be part of the “other” unspecified religions.

**CPW = children per woman**

**C = Christian**

**M = Muslim**

**ND = No Data**

**Data Format:**

Country Name, [2-letter](#) country code, region of world

CPW, Muslim Percentage, The Number of Muslims (if any), Christian Percentage

**Note 1:** The Child Per Woman (CPW) figure is for the entire country. The M: before the percentage and number stands for Muslim, and the C: stands for the Christian percentage, for example: CPW 6.69 CPW M:100% 31m C:0%. The [CPW](#) and [percentage](#) of Muslims and Christians come from the *CIA Factbook (2006)* unless a hyperlink points to *Wikipedia's* table on [Christians](#) or US State Department's Religious Freedom [Report](#).

**Note 2:** Due to different estimates, the numbers may not add up to 100%, and may be inconsistent with figures found elsewhere—even in this study. For instance: 1) Albania is listed below as having 2.5m Muslims, but a *BBC* article above puts it at 2.2m; 2) In Qatar the number of Muslims is said to be 95%, and the number of Christians at 8.1%, which adds up to 103.1%, perhaps because the 8.1% figure includes foreign workers; 3) Likewise in Bahrain, Muslims are supposed to be 98%, and Christians 9%, which adds up to 108%.
